

UIDAI Website – Defect Report

Tested by: Arunima

Email: Arunim@coforge.com

Employee ID: 85010883

Bug 1: "Grievance / Feedback Type" dropdown is not working.

Description: On the Grievance & Feedback page, the "Grievance / Feedback Type" dropdown does not respond when clicked. The list of options does not open, preventing the user from selecting a type.

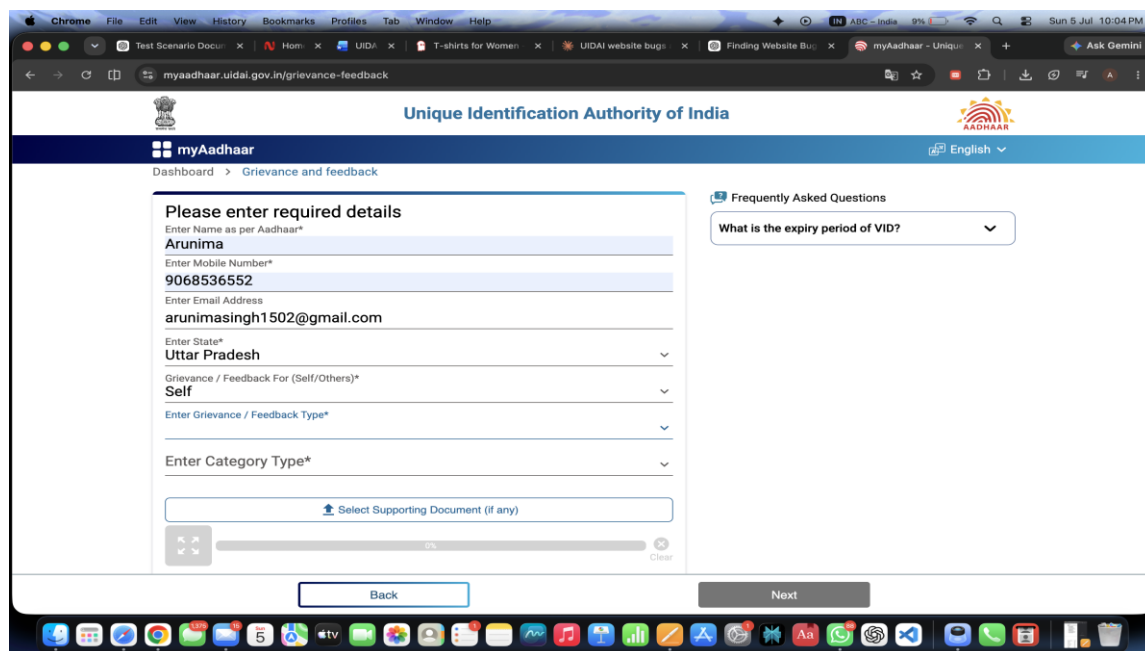

Steps to Reproduce:

1. Open the UIDAI myAadhaar website.
2. Navigate to the Grievance & Feedback page.
3. Click on the "Grievance / Feedback Type" dropdown.

Expected Result: Clicking the dropdown should display a list of selectable grievance/feedback type options.

Actual Result: The dropdown does not open and no options are displayed, blocking the user from proceeding with the form.

Screenshot:

Bug 2: "Category Type" dropdown is not working.

Description: On the same Grievance & Feedback page, the "Category Type" dropdown is also unresponsive. Users cannot select a category for their grievance/feedback.

Steps to Reproduce:

1. Open the UIDAI myAadhaar website.
2. Navigate to the Grievance & Feedback page.
3. Click on the "Category Type" dropdown.

Expected Result: The dropdown should expand and show a list of category options to choose from.

Actual Result: The dropdown does not open, and no category options are shown, preventing form submission.

Bug 3: Footer "To Collaborate, email to us" shows email in a non-standard format.

Description: In the website footer, the collaboration email is displayed as "collaborate[at]uidai[dot]net[dot]in" instead of a standard email format. Although clicking the link correctly opens the mail client with the right address, the visible text is not user-friendly and looks unpolished.

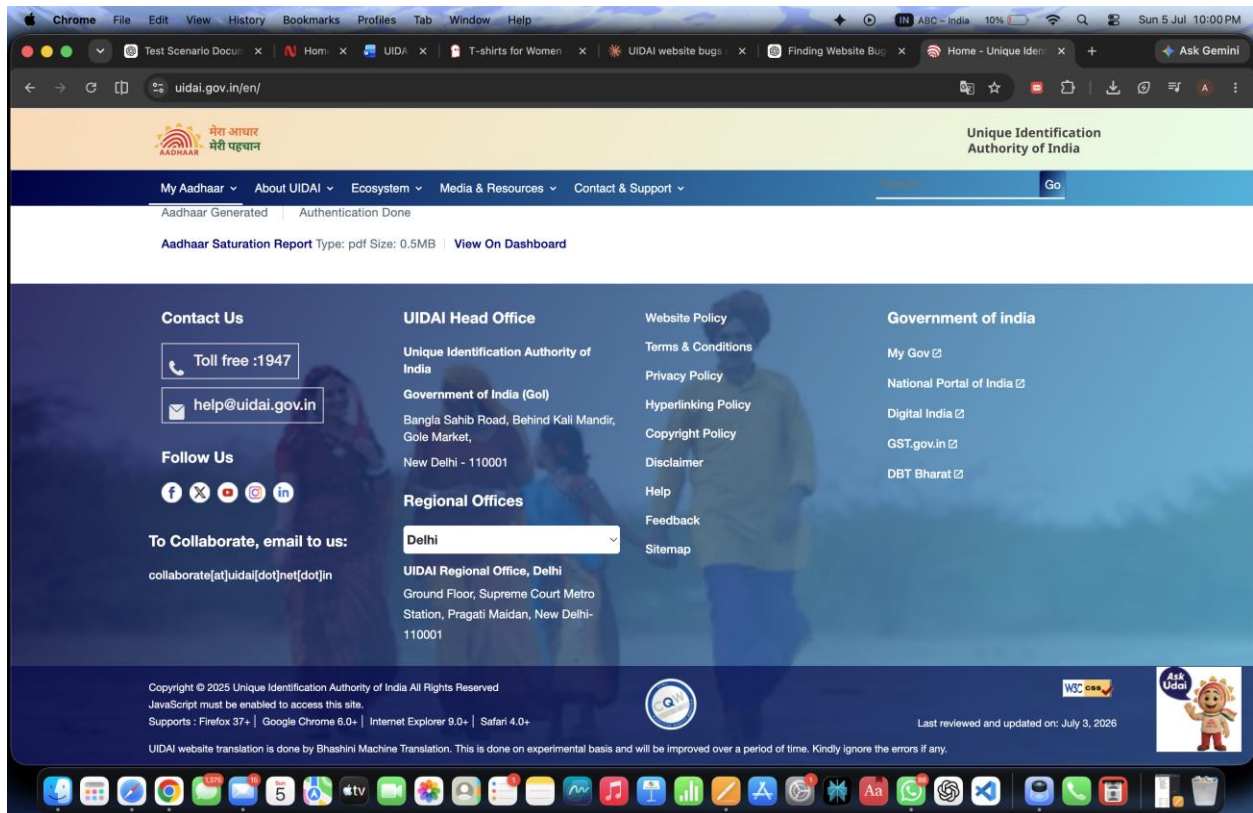

Steps to Reproduce:

1. Open the UIDAI website.
2. Scroll to the footer section.
3. Locate the "To Collaborate, email to us" link and observe the displayed text.
4. Click the link to verify the underlying email address.

Expected Result: The email address should be displayed in standard format, e.g. "collaborate@uidai.net.in".

Actual Result: The displayed text reads "collaborate[at]uidai[dot]net[dot]in", even though the mailto link itself opens the correct address.

Screenshot:

Bug 4: Dashboard breadcrumb on the Grievance & Feedback page redirects incorrectly.

Description: The "Dashboard" breadcrumb link on the Grievance & Feedback page is expected to take the user back to the original myAadhaar dashboard. Instead, it redirects to a different dashboard.

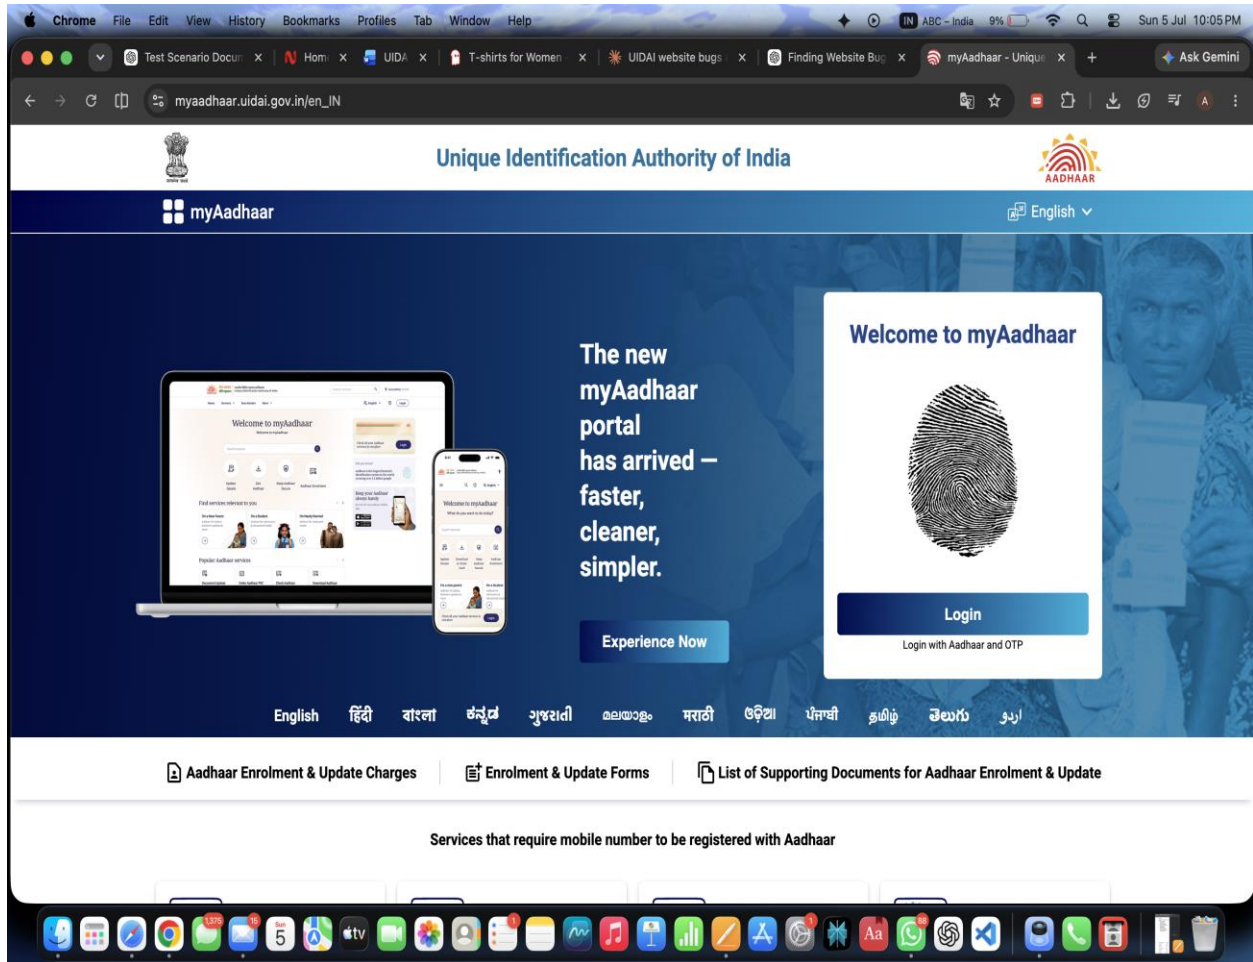

Steps to Reproduce:

1. Log in and open the myAadhaar dashboard.
2. Navigate to the Grievance & Feedback page.
3. Click on the "Dashboard" breadcrumb link at the top of the page.

Expected Result: Clicking the breadcrumb should redirect the user back to the original myAadhaar dashboard they came from.

Actual Result: The user is redirected to a different, unrelated dashboard instead of the original myAadhaar dashboard.

Bug 5: Search bar accepts special characters without validation.

Description: The search bar on the UIDAI website accepts special characters (e.g. <, >, {, }, ', ", ;, script-like input) without any input validation or sanitization, which is a potential security and data-integrity concern.

Steps to Reproduce:

1. Open the UIDAI website.
2. Click on the search bar.
3. Enter special characters or symbols (e.g. <script>, %, &, ', ", ;) into the search field.
4. Submit the search.

Expected Result: The search bar should validate input and reject or sanitize special characters, showing an appropriate message if invalid input is entered.

Actual Result: The search bar accepts special characters without any validation, allowing arbitrary/unsanitized input to be submitted.
